Footnotes

*This tap fee schedule is for wastewater customers on a decentralized wastewater service system. If a tap is made for account with a 1" or larger meter, or usually large consumption, the wastewater service will be sized accordingly and priced at cost plus 25%. Tap fee rates are defined for typical installations requiring no more than 50 linear feet of collection service line. Installations further from right of way will be charged installation cost plus 50%. This will be collected prior to installation.

**The standard system tap rates apply if service is connected outside a development designated as connected to a specific decentralized wastewater treatment facility.

*** A Standard Equivalent Dwelling Unit (SEDU) is defined as one typical home unit based on an average of 150 gallons of water used per day. Larger customers will be assessed SEDUs based on number of units or anticipated usage.

**** Services exceeding 100 feet from pump/tank to sewer main will incur additional service charges reflecting increased maintenance costs.

*****Flat Rate customers are based on a Minimum Monthly Charge Plus an estimated 3,000 gallons of water usage per month. A review of wastewater rates and revenue requirements will be done annually.
